

User Guide Kitchen Team

BOM & Recipe System — your day-to-day:
build, scale, print, and send for approval.

Why it helps & what it solves

Until now, recipes and quantities lived in Excel — manual math for every batch, scattered files, and every small change meant waiting for someone to update it. This system fixes exactly that:

Zero manual math

Enter how much you need to produce — the system computes the amount of every ingredient for you. No mental multiplying, no mistakes.

One-click printing

A clean prep sheet for any product, scaled to exactly the amount you want to make today.

Full independence

Build and edit recipes yourself — no need to ask anyone for every little change.

One source of truth

All recipes, ingredients and costs in one place, always up to date and the same for everyone.

In short

Less math, fewer mistakes, more control — with everything in one place.

What you see — a clean 5-screen menu

The kitchen team gets exactly what it needs, with no clutter: **Recipe Book**, **Test Recipes**, **Products**, **Where Used** and **Personal area**. No admin, settings or logs.

Result A simple side menu — click a screen and you're there.

💡 You can sign in from any device — phone, tablet or the kitchen PC.

1

Signing in

Go to **bom-system-two.vercel.app**, type your username and personal code, and click Sign In. Each team member has their own account.

A screenshot of a web application's sign-in page. The background is a solid dark purple. In the center, there is a white rectangular box. At the top of this box, the text 'THE KOSHER PLACE' is displayed in a serif font, with 'THE' and 'PLACE' in smaller letters above 'KOSHER'. Below this, in a smaller sans-serif font, is 'BOM & RECIPE MANAGEMENT SYSTEM'. Underneath the header, the text 'Sign In' is centered. Below 'Sign In', there are two input fields. The first is labeled 'USERNAME' and contains the placeholder text 'Enter your username'. The second is labeled 'SYSTEM CODE' and contains the placeholder text 'Enter your system code'. At the bottom of the white box is a dark purple button with the text 'Sign In' in white.**Result**

After signing in you land straight on the Recipe Book.

2

Recipe Book — browse & search

All recipes live here — base recipes and final products, each with a photo. Search by name, filter by allergen or spice level, and click a card to open the full recipe.

**Result**

Click a recipe to see its ingredients — and below, the quantity calculator.

3

Scale it — enter how much you need

Inside a recipe, in the **“Scale this recipe”** section, type how much you want to produce (in kg or units) and click **Calculate**. Here we asked for 80 kg.

The screenshot shows the 'THE KOSHER PLACE' BOM & Recipe System interface. The main content area displays the recipe for 'Seasoned Green Falafel Mix 15 kg- (Ready to use)(15 bags of 1 kg)'. The recipe card includes an image of the mix, the title, and details such as 'CKF-0061', 'Seasoned Green Falafel Mix 15 kg- (Ready to use)(15 bags of 1 kg) (Parve). Ready-to-serve catering product.', 'Contains: legumes', 'Net weight: 15.00 kg', and 'Servings: ~80'. Below the recipe card is the 'Ingredients' section, which lists the ingredients and their quantities. The 'Scale this recipe' section is at the bottom, featuring a text input field with the value '80' and a 'Calculate' button. A note below the input field reads 'Enter a target weight to see scaled quantities.'

INGREDIENT NAME	REF CODE	QUANTITY
Seasoned Green Falafel Mix 15 kg- (Ready to use)(15 bags of 1 kg)	CKF-0061	15.00 kg
Small Salad Bowl 8 Oz Clear 1 Unit	DSP-8214	15.00 kg

Scale this recipe

HOW MUCH TO PRODUCE (KG)

80

Enter a target weight to see scaled quantities.

Result

You enter a single number — no need to calculate anything yourself.

4

The result — every quantity, computed automatically

You instantly get a table with the exact amount of **every ingredient** for your batch, plus the estimated number of servings and the scale factor.

The screenshot displays the 'THE KOSHER PLACE' BOM & Recipe System interface. The main content area shows the recipe for 'Seasoned Green Falafel Mix 15 kg- (Ready to use)(15 bags of 1 kg)' with a yield of 15.00 kg. The recipe includes a list of ingredients and a table for scaling the recipe.

Ingredients

INGREDIENT NAME	REF CODE	QUANTITY
Seasoned Green Falafel Mix 15 kg- (Ready to use)(15 bags of 1 kg)	CKF-0061	15.00 kg
Small Salad Bowl 8 Oz Clear 1 Unit	DSP-0214	15.00 kg

Scale this recipe

HOW MUCH TO PRODUCE (KG): 80

Calculate

Print prep sheet

HOW MUCH TO PRODUCE (KG)	SCALE FACTOR	SERVINGS	SPICY
80.00 kg	x80.0000	~6400	X

Contains: legumes

INGREDIENTS	QUANTITY
Seasoned Green Falafel Mix 15 kg- (Ready to use)(15 bags of 1 kg) - CKF-0061	1,200.00 kg
Small Salad Bowl 8 Oz Clear 1 Unit - DSP-0214	1,200.00 kg

Result For 80 kg of product → the system computed 1,200 kg of each ingredient. No manual multiplying.

5

Print a prep sheet for the staff

Click **"Print prep sheet"** to get a clean, tidy sheet with the batch quantities — ready to print and post in the kitchen.

Seasoned Green Falafel Mix 15 kg- (Ready to use)(15 bags of 1 kg)

PREP SHEET

HOW MUCH TO PRODUCE (KG)
80.00 kg

SCALE FACTOR
x80.0000

SERVINGS
~6400

SPICY
X

Contains: legumes
Serve as desired.

Seasoned Green Falafel Mix 15 kg- (Ready to use)(15 bags of 1 kg) — 80.00 kg

INGREDIENTS	QUANTITY
Seasoned Green Falafel Mix 15 kg- (Ready to use)(15 bags of 1 kg) CKF-0061	1,200.00 kg
Small Salad Bowl 8 Oz Clear 1 Unit DSP-0214	1,200.00 kg

Result

A clear sheet with the computed quantities — exactly what's needed on the line.

6

Building a new recipe

Go to **Test Recipes** → **Build new recipe**. Give it a name and code, enter the yield (how many kg it produces), and add ingredients one by one with their quantity. You can also add preparation steps. This is a “sandbox” — it won’t enter the book until a manager approves it.

+ Add Ingredient

Preparation steps (optional)

Step 1

PROCESS EXPLANATION

Roast the eggplant, cool, and mix with the rest.

Result

Build freely without affecting the live recipes.

7

A missing ingredient — marked in red

If you enter an ingredient that isn't in the catalogue yet, it's **marked in red**. You can save and keep working, but a recipe with a red ingredient can't be approved until it's fixed.

The screenshot displays the 'BOM & Recipe System' interface. The main content area shows a recipe titled 'Roasted Eggplant Salad — Guide Demo' with a 'TEST' status. Below the title, it indicates 'BAS-9511' and 'A sample recipe built for this guide.' A warning message states: 'Ingredients not yet in the catalogue (red). Create them in Odoo and sync.' The recipe details include a yield of '5.00 kg' and '3' lines. The ingredients table lists three items: 'Drinking Water' (2.00 kg), 'Thin Salted Pretzels Dream Pretzels 60 gr' (0.05 kg), and 'Special tahini spread (not in catalogue yet)' (0.50 kg). The last ingredient is highlighted in red, indicating it is not in the catalogue. The preparation steps section shows 'Step 1: Preparation' with the instruction 'Roast the eggplant, cool, and mix with the rest.'

INGREDIENT NAME	REF CODE	QUANTITY
Drinking Water	ING-0065	2.00 kg
Thin Salted Pretzels Dream Pretzels 60 gr	DRY-2615	0.05 kg
Special tahini spread (not in catalogue yet)		0.50 kg

Result Red means: "replace this with a real item from the catalogue."

8

Send for approval — the manager returns it with a note

When you send a recipe for approval, the manager reviews it. If something's missing, they **send it back with a note** explaining what to fix — and the note appears at the top of the recipe.

The screenshot shows the 'KOSHER BOM & Recipe System' interface. The main content area displays a recipe titled 'Roasted Eggplant Salad — Guide Demo' (BAS-9511). A large red 'R' icon is visible. Below the title, a note states: 'Ingredients not yet in the catalogue (red). Create them in Odoo and sync.' A yellow banner below the recipe reads: 'What needs completing: Missing ingredient: "Special tahini spread" is not in the catalogue. Please replace it with a real item (e.g. oil) and resend.' The recipe details show a yield of 5.00 kg and 3 lines. The ingredients table lists: Drinking Water (2.00 kg), Thin Salted Pretzels Dream Pretzels 60 gr (0.05 kg), and Special tahini spread (not in catalogue yet) (0.50 kg). The preparation steps section shows 'Step 1 Preparation' with the instruction: 'Roast the eggplant, cool, and mix with the rest.'

INGREDIENT NAME	REF CODE	QUANTITY
Drinking Water	ING-9965	2.00 kg
Thin Salted Pretzels Dream Pretzels 60 gr	DRY-2815	0.05 kg
Special tahini spread (not in catalogue yet)		0.50 kg

Result

You see exactly what the manager asked you to fix — no guessing.

9

Fix it and resend

Replace the red ingredient with a real item from the catalogue (here: oil). Now all ingredients are green — no red — and you resend for approval.

The screenshot shows the 'KOSHER PLACE BOM & Recipe System' interface. The main content area displays a recipe titled 'Roasted Eggplant Salad — Guide Demo' (BAS-9511). A yellow warning box states: 'What needs completing: Missing ingredient: "Special tahini spread" is not in the catalogue. Please replace it with a real item (e.g. oil) and resend.' Below this, the 'INGREDIENTS' table lists three items: 'Drinking Water' (red icon), 'Thin Salted Pretzels Dream Pretzels 60 gr' (green icon), and 'Soybean Cooking Oil' (green icon). The 'PREPARATION STEPS' section shows 'Step 1 Preparation' with the instruction: 'Roast the eggplant, cool, and mix with the rest.'

INGREDIENT NAME	REF CODE	QUANTITY
Drinking Water	ING-0065	2.00 kg
Thin Salted Pretzels Dream Pretzels 60 gr	DRY-2015	0.05 kg
Soybean Cooking Oil	ING-0199	0.50 kg

Result

All ingredients recognised — the recipe is ready for approval.

10

The manager approves — and it enters the book

This time the manager approves. The recipe **enters the Recipe Book automatically** (under the “Base Recipes” tab) — and the whole team sees it, with the quantity calculator and printing.

Result Full circle: build → approve → available to everyone in the book.

Products — the ingredient catalogue from Odoo

The **Products** screen shows all raw materials, synced automatically from Odoo, with up-to-date cost and cost-per-kg. You can search and view weights.

Products — Odoo Catalogue 4137 / 4137

Summary & tips

Not sure about the quantity?

Just enter what you need to produce and click Calculate — the system does the math.

Red ingredient?

It's not in the catalogue. Replace it with a real item from the list before sending for approval.

Recipe not in the book?

Check whether it's still in "Test Recipes" or waiting in the manager's approval queue.

Work from your phone

You can sign in and print from any device — nothing to install.

Remember

The system saves you all the manual math — and lets you work independently, fast, and error-free.
